Full Stack Web Developer

I am currently enrolled at the UCLA Coding Bootcamp to become a Web Developer by June 2020. I have learned HTML, CSS, Bootstrap, JavaScript, jQuery, APIs, and Node so far. I am always eager to work with people in teams to solve problems, but I am willing to work alone as well. I am seeking a full-time employment as an entry level Web Developer. I have seven years of experience working in e-commerce and I can speak Spanish at an intermediate level.

Technical Skills

Languages: CSS, HTML, JavaScript, jQuery, Node, Express, MySQL, Mongo
Other: Microsoft Office, Salesforce, Terminal

Projects

Weather or Not: - GitHub Repo
Front-End App that allows users to determine activities to do based on their current location, the weather condition in their current location, and activities around their current location.
- Participated in a project with three other members using HTML, CSS, JavaScript and three APIs. The APIs included: Eventful (to determine local events), Google Maps (to determine the users' location), and Open Weather (to determine local weather conditions)
- I assisted in creating the if/else statements in JavaScript and helped to determine the suggestions that the user would be presented.

WeTrivia: - GitHub Repo
Full-Stack Application that allows users to play a trivia game. It also has a point scoring feature and a chat feature for players to message each other.
- I participated with three other members using HTML, CSS, Bulma, JavaScript, jQuery and MySQL. A third party API, called the Open Trivia was used to create the questions and answers for gameplay.
- I assisted in creating the login and logout features using Passport npm. I also created the routes for the application using JavaScript and Express.

Education

UC Santa Barbara
- B.A. History, June 2011

UCLA Extension
- Certificate in Web Development, June 2020
